

# ATOYEBI PAUL AYODELE

Researcher · Data Science & Machine Learning

Lagos, Nigeria · paulayodele04@gmail.com · +234 815 687 9564

[linkedin.com/in/atoyebi-paul](https://www.linkedin.com/in/atoyebi-paul) · [github.com/pauyoo](https://github.com/pauyoo) · [pauyoo.github.io/atoyebi](https://pauyoo.github.io/atoyebi)

## RESEARCH INTERESTS

Machine learning for healthcare and social impact · Natural language processing & misinformation detection · Explainable AI and interpretable predictive models · Supervised learning, deep learning, and statistical modelling · Data-driven decision support systems

## EDUCATION

### Master of Science (M.Sc.) — Computer Science

Sep 2023 – May 2025

Mountain Top University, Ogun State, Nigeria

CGPA: 4.33 / 5.00 (Second-Class Honours)

Research focus: Predictive modelling, supervised machine learning, and NLP applications

### Bachelor of Science & Education (B.Sc.Ed.) — Computer Science

Sep 2016 – Jun 2021

Tai Solarin University of Education, Ogun State, Nigeria

CGPA: 4.06 / 5.00 (Second-Class Honours)

## RESEARCH EXPERIENCE

### Customer Churn Rate Prediction

M.Sc. Research Project

Role: Data Scientist

- Designed and trained a supervised ML pipeline to identify at-risk customers, enabling targeted business retention interventions.
- Performed comprehensive data cleaning, feature engineering, and behavioural trend analysis on real-world customer datasets.
- Evaluated model performance with ROC-AUC, Precision, Recall, and Confusion Matrix; optimised thresholds for operational deployment.
- Stack: Python · Pandas · NumPy · Scikit-learn · Matplotlib

### Online Fake News Detection Using Deep Learning

M.Sc. Research Project

Role: Researcher

- Built an NLP text-classification system combining LSTM neural networks and classical ML algorithms for automated misinformation detection.
- Applied Tokenisation, TF-IDF, and text normalisation pipelines; achieved competitive classification accuracy across benchmark datasets.
- Research contributes to computational fact-checking and information-integrity tooling for online platforms.
- Stack: Python · Pandas · Scikit-learn · TensorFlow/Keras

### Pregnancy Risk Stratification Model

M.Sc. Research Project

Role: Researcher

- Developed a clinical risk-stratification model for adverse pregnancy outcomes using supervised classification on health records data.
- Addressed class imbalance, feature selection, and model interpretability to support maternal health decision-making.

## TECHNICAL SKILLS

---

|                       |                                                                      |
|-----------------------|----------------------------------------------------------------------|
| Languages & Analysis: | <i>Python (Pandas, NumPy), SQL, Excel, Power BI</i>                  |
| Machine Learning:     | <i>Scikit-learn · Regression · Classification · Ensemble Methods</i> |
| Deep Learning & NLP:  | <i>TensorFlow/Keras · LSTM · TF-IDF · Text Classification</i>        |
| Statistical Methods:  | <i>Hypothesis Testing · A/B Testing · Exploratory Data Analysis</i>  |
| Visualization:        | <i>Matplotlib · Seaborn · Power BI</i>                               |
| Dev & Collaboration:  | <i>Git · GitHub · Jira · Remote cross-functional teams</i>           |

## PROFESSIONAL EXPERIENCE
